

## DC12V、DC24V common inverter

### ■ Product features

- **Over width voltage:** Input:150-275V/75V-137V(-23%+25%);
- **Input voltage:** 115V or 220V+/-5%;
- Short-circuit, over-load, telephone lighting, battery over discharge, low voltage protection;

### ■ Applications

- Computer periphery, personal computer and working station;
- Mimic communication equipment;
- Info-household, household applicants;

## DC12V、DC24V specialized car inverter

### ■ Product features

- DC12V、24V invert 220V/50Hz;
- Small volume, light weight, no noisy, free maintenance;
- Low voltage protection;
- Over current/voltage and short-circuit protection;
- Transfer efficiency up to 90% with high reset function;
- With internal fuse, safety to reset.

### ■ Applications

- Car, steamship, solar energy, generator by window power, mobile phone, post, public security, rush to deal with an emergency etc;
- **Consumed electron:** cellar acoustics purpose for ship, color TV, high fidelity equalizer;
- **Computer/mobile office:** fax, note book computer、PC/17 indicator built-in/external ICD/DVD-ROM.
