

Voltage(TI/TA)

	Model	Transformer series (single power,three phase,isolating transformer large KVA rating)	
	Capacity(VA)	Single : 0-100K	three phase : 0-2000K
	Input voltage	110V or 220V or 380V or special voltage	
	Output voltage	110V or 220V or 380Vorr special voltage	
	Function	<p>We adopt the advanced technology from china and oversea and introduce the making procedure, single miniature power transformer, select filibustering igniting framework, high magnetism no direction silicon steeling sheet, smaller wearing down, higher efficient, three phase large KVA rating transformer, adopt safe compact configuration, no direction incisory CVT core, suitable supplied power system of large factory equipment and building facilities, and so on.</p>	
Dimension and weight	Please contact our agency and manufacturer.
