

UMART Tap-adjusted(TM), Surge(SV.BSV),Type parameter magnetic saturation(CV) technical parameter

Tap-adjusted(TM)

	Model	TM series atomized fully multi-functional AC AVR.		
	Capacity (VA)	500	1000	Single phase 500-10K
	Input Voltage	Super wide input 90V-270V		
	Output Voltage	115V or 220±5%		
	Function	It is multi-functional audio full AVR protector with many AVR from china, adoption advantages for many AVR from china and international		
	Applications	It's fit to low voltage, district fluctuating largely, application for fridge, TV set, acoustics, and so on home appliance		
	Dimension and weight	Please contact agency and manufacturer.		

Surge(SV.BSV)

	Model	AC automatic voltage regulator SV series		
	Capacity(VA)	15K	30K	single phase:500-10K three phases:1.5K-60K
	Input Voltage	140V-250V or 304V-456V		
	Output Voltage	110V±6% or 220V/380V±3%		
	Function	It is composed by osculated adjuster adoption controlling circuit, and servomotor. it's less waveform for output distortion, parallel voltage continually, wide range adjuster, stabilizers reliability and so also.		
	Applications	It's adjustable to PC, TV, acoustic, copy machine medical facilities, telecommunication equipment industrialized		
	Dimension and weight	Please keep touch with agency and manufacturer.		

Type parameter magnetic saturation(CV)

	Model	AC sympathetic vibration automatic voltage regulator CV series		
	Capacity(VA)	500W	2000W	Single phase 1500W-5KW
	Input Voltage	160V-260V		
	Output Voltage	115V or 220±5%		
	Function	It make use of special configuration for resonance constant transformer from inductance and capacitor, completely isolating for input and output, overload, shortcut protector and anti-interruptible feature		
	Applications	It is suitable for computer, test equipment, medical facilities and so on some anti-interruptible precision facilities		
Dimension and weight	Please contact agency and manufacturer.
